1. 安装jekkll，https://jekyllrb.com/

```
sudo apt update
sudo apt install -y ruby-full build-essential zlib1g-dev

# if you are using bash
echo '# Ruby Gems to ~/.gems' >> ~/.bashrc
echo 'export GEM_HOME="$HOME/.gems"' >> ~/.bashrc
echo 'export PATH="$HOME/.gems/bin:$PATH"' >> ~/.bashrc
source ~/.bashrc

gem install bundler jekyll

ruby -v
jekyll -v
```

```
git clone https://github.com/DreamXLab/DreamXLab.github.io.git
cd DreamXLab.github.io.git
```

3. 在_projects新建一个.md 文件，填写模版

4. 本地测试，localhost:4000

```
bundle exec jekyll serve
```
